Hero Section

Aerial. Ground. Story.

Every Angle, One Story.

JSDetail blends drone aerial cinematography, studio photography, and cinematic storytelling to create visuals that captivate and communicate. From soaring exterior vistas to intimate product close-ups, we deliver imagery that elevates your narrative. Each project is approached with a cinematic vision and an outcome-oriented mindset – we focus on the results you need, whether that's selling a property faster or giving your brand a striking visual voice. We start with your story and use the latest technology and creative precision to **bring it to life from every perspective.**

Intro / Value Proposition

Combining sweeping aerial views with on-the-ground detail is our formula for a complete, compelling story – an approach proven to boost engagement and drive results ¹. By uniting drone footage, high-end photography, and narrative-driven editing, we ensure your audience sees the full picture. The outcome? **Immersive visuals that inspire action** – buyers envision themselves in a home, customers crave your product, or viewers connect with your mission. We don't just deliver pretty pictures; **we deliver impact.**

Value Pillars

- **Cinematic Storytelling:** Every project is crafted like a film. We don't just shoot scenes; we build a narrative. Through careful planning, dramatic composition, and masterful editing, we ensure your visuals aren't just attractive – they're emotionally resonant and memorable. The result is content that feels like a mini movie, leaving a lasting impression on your audience.
- **Every Angle Covered:** We are hybrid image-makers. Our drone captures the grand, bird's-eye perspective while our ground cameras capture the human-scale details. By covering all angles, we give viewers a comprehensive experience. (In real estate, for example, pairing aerial shots with interior photos provides a complete property story – an approach that attracts more interest and helps close deals ¹.) You get a one-stop solution for **360° visual coverage** with a consistent style and quality.
- **Precision & Detail:** We sweat the small stuff because details matter. From focusing a macro lens on the texture of a product to color-grading footage for the perfect mood, we are obsessed with quality. High-resolution, crystal-clear images and smooth, stable footage are our standard. We know that in marketing, image quality can make or break a sale – roughly 67% of consumers consider image quality essential when making purchase decisions ². That's why we ensure every pixel is polished and every frame is purposeful.
- **Licensed & Insured:** Professionalism and safety underpin everything we do. We are FAA Part 107 certified for commercial drone operations (all commercial drone flights in the US must be conducted

by a Part 107 licensed pilot ³), and we carry full liability insurance for our work. We conduct thorough pre-flight checks, adhere strictly to airspace regulations, and prioritize safety on set. When you work with JSDetail, you're partnering with a **reliable, compliant team** that you can trust to protect your project and reputation.

Portfolio Preview

Selected Projects: Here's a glimpse of our recent work – each project showcasing the range and impact of our hybrid imaging approach:

- **Skyline Luxury Condos – Aerial Tour:** A breathtaking 4K drone video tour of a high-rise condominium, captured at golden hour. The sweeping shots highlighted not just the building but its downtown surroundings, helping the developer pre-sell units faster than expected.
- **Farm-to-Table Cuisine – Food Photography:** A mouth-watering photoshoot for a farm-to-table bistro. We styled and shot signature dishes and cocktails, emphasizing vibrant colors and textures. The resulting images were used in the restaurant's new menu and social media campaign, driving a notable uptick in reservations.
- **Innovative Gadget Launch – Product Film:** A cinematic product video for a tech startup's new gadget. We combined macro photography (to showcase intricate design details) with lifestyle footage of the product in use, all woven together in a story-driven edit. The launch film garnered thousands of views and high engagement, reinforcing the product's quality and innovation.
- **Heritage Bridge Inspection – Industrial Mapping:** High-detail drone imagery and orthomosaic mapping of a historic bridge for an engineering firm. Our aerial survey provided a comprehensive view of the structure's condition without any road closures. The detailed 3D map helped identify maintenance needs and saved the client weeks of manual inspection time.

(Additional portfolio pieces can be listed or showcased visually. Each thumbnail/image can have a brief caption similar to the above, highlighting the project type, our approach, and the outcome.)

Testimonials

"Our listing never looked so good. The aerial photos and video literally set us above the competition. We had a buyer in 6 days – at 5% over asking price."

— **Jane D.**, Realtor, **Skyline Realty**

"JSDetail's images gave our online store a huge boost. The product shots were so crisp and inviting – our monthly sales jumped immediately after we updated the site."

— **John S.**, Founder, **CraftedGoods Co.**

"The video they produced for us was pure cinema. It captured our company's story in two minutes and struck an emotional chord with our audience. Customer engagement went through the roof."

— **Mary J.**, Marketing Director, **Acme Innovations**

(Each testimonial above can be styled as a quote on the site, with the client's name and role/company.)

Call to Action

Ready to elevate your story? Let's work together to create something remarkable. Whether you need photos, video, or an all-of-the-above campaign, we're here to deliver stunning results. *Contact us* now to start planning your next project and **let your vision take flight**.

Aerial Services (Drone Imaging)

See the world from a higher perspective. Our **aerial photography and videography services** put your project in the best light—from above. We operate professional-grade drones to capture ultra-smooth 4K footage and high-resolution stills that were once impossible to get without a helicopter. Whether it's about showcasing an expansive property, inspecting infrastructure, or surveying land, our drone team delivers **sharp, cinematic visuals** with efficiency and safety. We handle all the details, from flight planning and permits to post-processing, so you can focus on using the insights and breathtaking imagery we provide.

Use Cases

- **Real Estate Marketing:** Give potential buyers a view that truly sets your listings apart. Our aerial home and commercial property shots highlight the full scope of a property—house, land, neighborhood, and all. (Homes with aerial imagery attract dramatically more interest and even sell faster on average ¹.) The unique vantage point not only looks stunning but also builds buyer confidence by showcasing context and scale.
- **Inspections & Surveying:** Safely inspect roofs, towers, farmland, and other hard-to-reach places. Drones can increase efficiency and keep inspectors out of harm's way ⁴, all while capturing detailed visual data. We use UAVs to perform close-up inspections of structures (for example, looking for damage on a roof or cell tower) without the need for ladders or lifts. You receive high-resolution photos or live video feed of problem areas, making maintenance planning faster, safer, and more cost-effective.
- **Mapping & 3D Modeling:** Quickly survey large areas and produce accurate maps. Using automated flight plans and specialized software, we can create orthomosaic maps, elevation models, and even 3D reconstructions of terrain or structures. Drone mapping is up to **5× faster** than traditional ground surveying methods ⁵, meaning you get actionable data on tight deadlines. From construction sites to agricultural fields, our aerial maps help with planning, monitoring progress, and documenting conditions with precision.

Deliverables

When you hire us for aerial imaging, you can expect **professional deliverables** tailored to your needs: -

- **Ultra-HD Aerial Photographs:** High-resolution aerial photos (20MP and above) delivered in JPG/TIFF formats. Perfect for print materials, listings, and detailed analysis (you'll be able to zoom in on fine details).

- **4K Stabilized Video Footage:** Smooth, cinematic drone video clips (up to 4K resolution) of key locations or subjects. We can provide raw footage or fully edited highlight reels ready for marketing use.

- **Interactive Maps & Models:** For survey projects, we deliver processed orthomosaic maps (georeferenced for accuracy) and 3D digital models. These files can be viewed in standard mapping software or shared with stakeholders to explore the site virtually.

- **Flight Logs & Compliance Docs:** Upon request, we include copies of relevant flight logs, permissions (for

flights in controlled airspace), and our certification/insurance info. We want you to feel assured that every flight was done legally and safely.

(We ensure all final images and videos are color-corrected and optimized. Deliverables are provided via a secure online gallery or cloud link for easy access and download.)

Case Study: Industrial Roof Inspection

Client: A large manufacturing company faced potential storm damage to a 200,000 sq. ft. facility and needed a roof inspection **immediately** – without disrupting operations.

Our Solution: JSDetail deployed a drone team to survey the entire roof. In under an hour, we captured high-resolution photos and 4K video of every section, including close-ups of areas that looked compromised. The drone overflights meant no scaffolding or safety risks for inspectors.

Outcome: We delivered a comprehensive inspection report the same day, complete with annotated images pinpointing several damaged HVAC units and sections of torn flashing. The client avoided a time-consuming manual inspection and got the data needed to expedite repairs. They estimated a savings of two weeks of downtime and were able to start fixes immediately, all while their staff stayed safely on the ground.

Call to Action

Ready to reach new heights? Let's discuss your aerial imaging needs. From real estate to industrial inspections, we have the expertise to get the shot. *Contact us* today to schedule a drone shoot or request a quote. We'll ensure you get **the view from above** that makes a difference.

Studio Photography (Macro & Product)

Showcase the smallest details in the best light. Our **studio photography services** cover macro, food, and product shoots that bring out the beauty in every subject. In our controlled studio environment (or on-location setup), we meticulously arrange lighting, backdrops, and composition to highlight what makes your product or creation special. The result? **Crisp, high-impact images** that can make viewers practically taste the dish or feel the craftsmanship of your product. We understand that great product photos aren't just pretty—they drive sales and build brand trust. With a precise, confident shooting style, we turn objects into stories and images into conversions.

Use Cases

- **Product Catalog & Ecommerce:** Make your online store or catalog stand out with professional product photography. Whether it's electronics, fashion, cosmetics, or handcrafted goods, we capture clean, high-resolution images from multiple angles. We also specialize in **macro shots** for products like jewelry or tech gadgets, revealing the intricate details and quality up close. (When shoppers can see fine details and quality, they're far more likely to trust the product and hit "Buy Now.") We ensure consistent lighting and color so your brand looks unified across every SKU.
- **Food & Beverage Marketing:** Tempt customers with delicious imagery. We work with restaurants, chefs, and food brands to photograph dishes and drinks in a way that makes viewers' mouths water. Every element is styled – steam rising from a hot meal, the glisten of a sauce, fresh ingredients arranged just so. These photos are perfect for menus, websites, social media, and campaigns. We

aim to convey **flavor through visuals**, tapping into the idea that people “eat with their eyes first.” Expect rich colors, sharp details, and an appetizing aesthetic that reflects your culinary brand.

- **Lifestyle & Editorial Shots:** Sometimes you need more than a white background. We can create small studio scenes or flatlays that put your product in context. For example, an artisan coffee cup shown on a rustic table with scattered beans, or a skincare product surrounded by natural ingredients. These editorial-style images are great for advertisements, magazine spreads, or Instagram stories. They tell a story around your product, connecting it to a lifestyle or value. Our team will collaborate on creative concepts to match your brand’s personality and message.

Deliverables

Our studio photography packages typically include: - **High-Resolution Edited Photos:** You’ll receive each final image in ultra-high resolution (suitable for large prints) as well as web-optimized sizes. All photos undergo careful editing and retouching – we adjust lighting, remove dust or blemishes, and ensure true-to-life color.

- **Multiple Angles & Formats:** We usually shoot a variety of angles (front, detail close-up, in-use shot, etc.) per product. We can provide versions with transparent backgrounds (PNG) if needed for graphic design, and formatted crops (e.g. square for Instagram, 16:9 for web banners) upon request.

- **Styling and Props (if applicable):** If your shoot requires props or styling (common in food and lifestyle images), we include a planning consultation. We can source appropriate props/backdrops or work with those you provide. A shot list or mood board can be developed so we capture every concept you envision. *(While this isn’t a “deliverable” file, it’s part of our service to ensure the imagery meets your vision.)*

- **Usage Rights:** All images come with a broad usage license for your business – meaning you can use them across your website, social media, and print materials without extra fees. (We simply ask for credit where feasible, but it’s not required.)

Case Study: Farm-to-Table Menu Refresh

Client: A local farm-to-table restaurant was rebranding and needed fresh visuals for their new menu and website. Their challenge was conveying the vibrant, rustic charm of their cuisine through photos.

Our Approach: We organized a full-day shoot on-site at the restaurant. Working closely with the chef, we plated five signature dishes and crafted a natural, warm lighting setup that mimicked daylight through a farmhouse window. Macro lenses let us capture the textures – the char on a steak, the droplets on a salad. We also included ingredients in the compositions (herbs, spices, farm produce) to reinforce the farm-fresh story.

Result: The final photos were rich and inviting. A colorful heirloom tomato salad shot became the cover of their menu, and a dramatic dessert shot generated a buzz on social media. The restaurant reported that within a month of launching the new site with our images, online reservations increased and many guests commented they came in after seeing the photos. The client praised how the images “conveyed the atmosphere and love that goes into our food,” helping attract patrons who value their story.

Call to Action

Ready to make your product shine? Whether you’re looking to update a menu, launch a new product line, or overhaul your online store, we’re excited to collaborate. *Contact us* to plan your studio shoot – we’ll capture the detail, color, and style that makes your offerings unique, and help you present them to the world with confidence.

Cinematic Visual Storytelling (Video Production)

Your story, captured on film. Our **cinematic storytelling service** is all about transforming your message into a moving visual experience. We produce high-quality videos – from concept through final edit – that engage, inform, and inspire. This includes brand films, promotional videos, event highlights, and short-form documentaries. We bring the same level of precision and artistry to video as we do to photography: careful planning, beautiful composition, dynamic drone shots, and thoughtful editing. The tone can range from dramatic to playful, but the end goal is always the same: **connect with your audience**. In an age where video content is king (over 80% of consumers say a brand's video convinced them to purchase ⁶), cinematic storytelling is a powerful tool to elevate your brand or project.

Use Cases

- **Brand & Product Films:** Tell your brand's story in a way that captivates customers. We create short promotional films that can showcase your company mission, a behind-the-scenes glimpse of your process, or a new product launch with flair. These videos are perfect for your website homepage, Kickstarter campaigns, or social media ads. We focus on narrative and emotion – for example, weaving customer testimonials or founder voiceovers with visuals of your product in action. The result is a piece that not only explains *what* you do, but more importantly *why* you do it, forging a personal connection with viewers. *(Fun fact: compelling brand videos can directly drive sales – 82% of consumers have been convinced to buy a product or service after watching a video ⁶.)*
- **Event Highlights & Recaps:** When you host a big event – be it a corporate conference, a community festival, or a private celebration – you want those moments captured forever. We offer multi-angle event videography, including aerial shots of venues and crowds, candid ground footage of attendees, and interviews or sound bites if needed. Afterwards, we edit the footage into an exciting highlight reel (or a series of short clips) that tells the story of the event from start to finish. Event recap videos are fantastic for marketing future events, sharing with participants, or as a keepsake for memorable occasions. We make sure to preserve the **energy and emotion** of the day in the final cut.
- **Documentary-Style Shorts:** Sometimes the story you need to tell is real and unscripted. We produce short documentary videos and testimonial-driven pieces that shine a light on real people and real stories. This could be a customer success story, a mini-doc about a cause your organization cares about, or a profile of an individual (artist, entrepreneur, etc.) that you want to showcase. Our team handles it with care – conducting interviews, capturing B-roll that reinforces the narrative, and editing it into a compelling story arc. The tone is authentic, human, and often inspiring. These videos are great for content marketing, PR campaigns, or internal use to remind your team of the impact of their work.

Deliverables

When you partner with JSDetail for video production, you'll receive: - **Full-Length Video:** A polished final video in the agreed format and length (for example, a 2-3 minute brand film or a 60-second social media ad). Delivered in HD or 4K resolution as needed, in common file formats (MP4, MOV). We ensure the video is optimized for its primary platform – whether it's going on a big screen at an event or on a mobile-friendly web page.

- **Social Media Cutdowns:** Attention spans are short online. If desired, we'll provide shorter edits of your

video suitable for social media channels (like a 15-second teaser for Instagram or a 30-second cut for LinkedIn). These are edited to grab attention quickly while maintaining your core message, and often include captions or text overlays for sound-off viewing.

- **Professional Audio & Music:** Great video isn't just about visuals. We include high-quality audio in every production. This means clear recorded dialogue (we use professional microphones for interviews/voiceovers) and carefully chosen music tracks that match the mood. We handle the music licensing or use royalty-free tracks, so you don't have to worry about the legal side. We also do sound mixing to balance music with dialogue and add sound effects if needed.

- **Storyboard/Script Development:** (Pre-production deliverable) For scripted projects like brand promos, we work with you to develop a concept and script or storyboard before we ever film. We can provide a written script and/or illustrated storyboard for approval, ensuring we're aligned on the vision. This way, you know what to expect, and the production process is efficient. *(You keep these materials – they're useful for internal marketing teams or future projects.)*

Case Study: Outdoor Gear Brand Film

Client: AlpineQuest, a startup outdoor gear brand, wanted a powerful launch video to introduce their new hiking backpack line. They needed to stand out in a crowded market by emphasizing the backpack's durability and the brand's adventurous spirit.

Our Approach: We collaborated with AlpineQuest to script a 2-minute brand film titled "Journey to the Summit." We scouted a scenic mountain location and shot over two days. The video featured a hiker (an actor) trekking through forests and up rocky slopes at sunrise, using the AlpineQuest backpack. We incorporated drone footage to capture sweeping mountain panoramas and ground-level shots for the hiker's determined face and the backpack's details in use. We recorded the founder's voice as a narrative voiceover talking about pushing limits and designing gear that keeps up. Inspiring music carried the film forward.

Result: The final video was cinematic and motivational. Upon release on the brand's website and YouTube, it immediately resonated – thousands of views and comments about how it "felt like a mini-movie." Within a week, AlpineQuest saw a spike in social media followers and inquiries. The client reported that the video not only boosted initial sales of the backpacks but also solidified their brand identity. It became a cornerstone of their marketing, used in presentations and trade shows to draw in retailers. They thanked us for "capturing the soul of our brand" and credited the film with helping launch their company with strong momentum.

Call to Action

Ready to tell your story through film? We're passionate about creating cinematic videos that deliver your message with impact. If you have a vision (or need help shaping one), *contact us* and let's talk about bringing it to life. From pre-production planning to the final edit, we'll guide you through every step and craft a video that truly stands out. Your story deserves the silver-screen treatment – and we're here to provide it.

About JSDetail

Our Philosophy

At JSDetail, we believe **great visuals begin with great vision**. Our philosophy centers on the idea that imagery isn't just decoration – it's narrative. We founded this studio to help clients tell their stories in a more powerful way, by marrying technical excellence with creative storytelling. That means we approach every shoot with two questions in mind: *"What story are we telling?"* and *"How can we capture it best?"*

We are outcome-oriented and precise in execution. It's not enough for us that a shot looks beautiful – it must also serve a purpose and resonate with the audience. Whether it's evoking an emotional response or highlighting a critical detail, **every frame is intentional**. We draw inspiration from cinema, design, and the world around us, but we never lose sight of our client's goals. When you work with JSDetail, you get a partner who is as invested in the success and impact of the final product as you are.

(And yes, we're called JSDetail for a reason – we sweat the details. It's in our name, and it's in everything we do, from planning to post-production.)

The Team

Behind the name JSDetail is a **small, dedicated team of visual storytellers**. We come from diverse backgrounds – including photography, film production, and even engineering – but we're united by a shared passion for technology-assisted art. We like to say we have "the artist's eye and the pilot's steady hand." Our lead drone operator is an FAA-certified pilot with hundreds of logged flight hours, and our lead photographer has over a decade of experience capturing images that make people say "wow." On larger projects, we tap into a trusted network of collaborators (such as additional camera operators, stylists, or sound technicians) to ensure we have all the skills needed on deck.

What does this mean for you? It means you get the personal attention and agility of a boutique studio, **combined with a breadth of expertise** that covers all aspects of production. We work closely together (often literally side-by-side on shoots) to make sure aerial and ground footage complement each other, and that the story comes through in every medium. We're friendly, we love what we do, and we're driven to keep learning new techniques so that we can bring fresh ideas to our clients.

(Fun fact: We often find ourselves finishing each other's sentences on set – that's how in sync our team operates!)

Equipment & Technology

We're gearheads at heart, and we equip ourselves with **professional-grade tools** to deliver top-notch results: - **Drone Fleet:** We operate advanced DJI drones that capture up to 5.1K video and 20+ megapixel photos. With gyro-stabilized cameras and obstacle avoidance tech, our drones can execute smooth cinematic shots even in challenging environments. From nimble drones ideal for indoor or tight-space flights to larger models for heavy winds and high-altitude stability, we have the right UAV for the job.

- **Camera Systems:** For ground photography and video, we use high-resolution full-frame mirrorless cameras and an array of sharp lenses. This includes specialty macro lenses for extreme close-ups (think capturing the logo engraved on a ring or the dewdrop on a petal in perfect clarity) and fast prime lenses for that creamy cinematic background blur in interviews or product glamour shots. Our cameras are 4K/6K

capable, ensuring **broadcast-quality footage**.

- **Supporting Gear:** Great shots require more than just cameras. We bring a full lighting kit – softboxes, LED panels, reflectors – to sculpt light exactly as needed, whether it's creating dramatic shadows for a moody portrait or eliminating every shadow on a crisp product photo. We have motorized gimbals and sliders for ultra-smooth moving shots, tripods and dollies for steady frames, and high-quality audio recorders and mics for capturing sound during video shoots. For aerial mapping projects, we use precision ground control points (and RTK GPS on drones when needed) to achieve survey-grade accuracy.

- **Post-Production:** Our work doesn't end when the shooting does. We utilize industry-standard software (Adobe Creative Suite, DaVinci Resolve, etc.) for editing and post-production. This means we can perform advanced color grading to give your video a signature look, retouch photos to magazine standards, and even integrate motion graphics or titles into videos. Our editing workstations are calibrated for color accuracy, so what we deliver looks great on any screen or in print.

In short, we invest in our equipment so that **you get the quality, reliability, and creative options** that come with it. We're always happy to talk tech details if you're curious – and if not, just know that we've got state-of-the-art tools working behind the scenes on your behalf.

Safety & Compliance

Safety isn't just a checkbox for us; it's an integral part of our process. We plan every drone flight and on-ground shoot with a safety-first mentality. Here's how we ensure peace of mind for our clients: - **FAA Certified:** In the United States, any commercial drone operation requires a licensed pilot. We have that covered – our chief pilot holds an FAA Part 107 Remote Pilot Certificate (the federal certification for commercial UAV pilots) and stays up-to-date with all regulations. (Under FAA rules, all commercial drone flights must be conducted by a Part 107 certified pilot ³, so this is non-negotiable.) We will gladly provide proof of certification upon request.

- **Insurance:** We maintain comprehensive liability insurance that covers our drone operations and on-site work. While we always operate carefully, we have insurance in place as a solid backstop. This coverage protects you, us, and the general public in the unlikely event of an incident. Simply put, we're prepared for the "what ifs" so you're never exposed to unnecessary risk.

- **Site Planning and Permissions:** Before we take off or set up, we do our homework. For drone projects, we survey the area for any airspace restrictions – if we need air traffic control authorization (for example, near airports), we handle that via the FAA's LAANC system or file for waivers in advance. We also follow local laws and property permissions; if a location requires a permit to film or fly, we'll coordinate with authorities to obtain it. On the day of the shoot, we establish a safe perimeter for takeoff/landing and have visual observers on hand when necessary to monitor the airspace.

- **On-Set Safety Practices:** For ground shoots, we ensure all equipment (lights, tripods, cables) is securely set up and not posing tripping hazards. Our team is trained in basic first aid and we keep a kit in our gear bag. We also keep an eye on weather and environmental conditions – for instance, if lightning is in the area, the drone comes down; if we're shooting on a slick surface, we wear proper footwear and take it slow. Safety extends to your property and participants as well: we won't fly over people without consent and appropriate safety measures, and we respect privacy boundaries (no peeking at neighbors or off-limit areas).

- **Data Security & Privacy:** We treat captured data with confidentiality. If we are filming something sensitive (say, a new product prototype or a private event), rest assured that footage is handled securely. We can sign NDAs if required. We also adhere to privacy guidelines – for example, if we collect aerial images for a map, and it incidentally includes neighboring properties, we can blur out faces or license plates if needed.

Our commitment to compliance and safety means you can hire us with confidence. We've done the homework, met the requirements, and continually train ourselves so that every project is executed **responsibly and professionally**. You're in safe hands with JSDetail.

Contact Us

We'd love to hear from you! Whether you have a detailed brief or just an exciting idea, feel free to reach out and start the conversation. **Tell us about your project, ask us questions, or request a quote** – we're here to help and will respond within one business day.

Please fill out the form below (or send us an email) and we'll get back to you quickly. *No project is too small or too ambitious – if you need visuals, we want to make them happen.* We're excited to learn how we can assist you.

- **Name:** Let us know who you are.
- **Email:** Your contact email (so we can reply).
- **Phone:** *(Optional)* A phone number if you'd like us to call or text.
- **Project Details:** What are you looking for? Tell us a bit about the services you need, your vision, or any questions. The more info, the better – but it's okay if you're not sure where to start. We can figure it out together.

(Hit "Send" on the form and your message will wing its way to our inbox. We typically respond within 24 hours on weekdays. If you reach out over the weekend or holiday, we'll reply as soon as we're back at the desk.)

Thank you for considering JSDetail. We look forward to connecting with you and creating something amazing together!

Privacy Policy (Summary)

Your privacy is important to us. This is a plain-language overview of our privacy practices:

- **Information We Collect:** If you contact us or fill out a form on our site, we will collect the personal information you provide (such as your name, email address, phone number, and project details). We may also collect basic analytics data when you use our website (such as cookies or usage statistics), which helps us improve our site's performance and user experience.
- **How We Use Your Information:** We use personal information *only* for its intended purpose – for example, to respond to your inquiries, provide quotes, and deliver services you've requested. If you become a client, we'll use your info for project communication and deliverables. We do **not** sell your personal data to third parties. We won't share it with outside parties except as necessary to fulfill your requests (for instance, if using a third-party print lab to deliver photos, with your permission) or as required by law.
- **Cookies & Tracking:** Our website might use cookies or similar technologies to enhance your browsing experience. For instance, we may use Google Analytics or another tool to see how many people visit our site and which pages they view. These tools may set cookies in your browser. This

information is generally collected in aggregate and doesn't identify you personally. You can disable cookies in your browser if you prefer, though some site features might not function as well.

- **Data Security:** We take reasonable measures to protect your information. Our email, computers, and storage drives are secured and encrypted where possible. If we store any of your data online (say, your photos or videos in a delivery gallery), we ensure those platforms are reputable and secure. However, please understand that no method of data transmission or storage is 100% secure, so while we strive to protect your personal info, we cannot guarantee absolute security.
- **Your Rights:** You retain rights over your personal information. If at any time you want to know what information we have about you, or you need us to correct or delete something, just let us know. For example, if you submitted a contact form and want that information erased from our records, we will do so (unless we're required to keep it for administrative or legal reasons).
- **Policy Updates:** We may update our privacy policy from time to time as our services or legal requirements change. Significant changes will be communicated via our website. We encourage you to check this section periodically. By using our website or services, you acknowledge the terms of this privacy summary. If you have any concerns or questions about how we handle privacy, please contact us and we'll be happy to provide more detail.

(This summary is provided for convenience and clarity. For more detailed information or specific inquiries about privacy, please reach out to us.)

Terms of Service (Summary)

By using the JSDetail website or engaging our services, you agree to the following in plain terms:

- **Website Content:** The content on our website (text, images, videos) is owned by JSDetail (unless credited otherwise). You're welcome to read, share, or link to our content, but please do not reproduce or use it for commercial purposes without our permission. Likewise, any logos or trademarks displayed are our property or that of our partners. Using our site doesn't grant you any license to these assets.
- **Acceptable Use:** You agree to use our website lawfully and respectfully. Don't attempt to hack, spam, or distribute malicious content through our site. You also agree not to use our site in a manner that could disable or impair it for others. Essentially, be a good internet citizen – no harmful or illegal activities involving our site.
- **Third-Party Links:** Our website might contain links to third-party websites or services (for example, a client's site in our portfolio or an article we're mentioned in). We provide these links for convenience or reference. However, we do not have control over those external sites and can't be responsible for their content, availability, or practices. Visiting those sites is at your own discretion, and you should check their own terms and policies.
- **Service Agreements:** If you hire us for a project, we will likely have a separate contract or agreement that outlines the project scope, deliverables, payment terms, etc. Those specific terms will govern the professional relationship. However, these general Terms of Service still apply to your usage of our website and any non-contractual interactions.
- **Liability:** We strive to provide accurate information on our site and deliver our services with high quality. That said, the website content is provided "as is" and might occasionally include errors or updates that we haven't caught yet. We do not guarantee that the site will be 100% error-free or uninterrupted. In using our site or services, you agree that JSDetail will not be held liable for any indirect or consequential damages arising out of such use. For example, if our website is down

temporarily or you base a decision on an informational article on our blog, we can't be responsible for losses from that. Our liability for any claim related to your use of our site or services will, in any case, be limited to the amount you paid us (if applicable) for those services.

- **Governing Law:** Our business is based in Illinois, USA, so our terms and any disputes arising from your use of our site or services are governed by the laws of the State of Illinois. If any issue or dispute comes up that can't be resolved amicably, it will be handled in the appropriate courts of Illinois.
- **Acceptance:** By continuing to use our website or by engaging with us (such as sending a message or starting a project), you indicate your acceptance of these terms. If you do not agree with these terms, please refrain from using the site. We reserve the right to update these Terms of Service from time to time. If changes are made, we'll update the effective date and note the changes on this page. It's a good idea to review this section periodically.

(This summary is intended to be easy to read. If you require any clarification on these terms or how they apply to you, please contact us. We value transparency and will gladly answer your questions.)

Frequently Asked Questions (FAQ)

- **What areas do you serve?** – We're based in Illinois and primarily serve the Central Illinois and Chicago areas. However, we're mobile and love to travel! For the right project, we can come to you wherever you are. Just keep in mind that travel fees may apply for distant locations – we'll discuss all that during the planning.
- **Are you licensed and insured for drone work?** – Absolutely. We hold an FAA Part 107 certification to fly drones commercially (which is legally required) and we carry liability insurance specific to drone operations. In short, we're fully licensed, insured, and experienced – your project is in safe, professional hands.
- **How do I book a shoot or project with you?** – It's easy! Start by contacting us through our website form or by email/phone. Let us know what you have in mind (the more details the better). We'll typically respond within a day to discuss your needs, propose some ideas if needed, and give you an initial quote or consultation. Once we agree on the scope, we'll schedule the shoot dates and handle any necessary prep (such as location scouting or shot lists). A simple contract and a deposit may be required to lock in the dates. Then we get to work creating something awesome for you!
- **What is your turnaround time for deliverables?** – We pride ourselves on a quick turnaround without compromising quality. Photographs are usually ready within 3–5 business days after the shoot (depending on the volume, possibly sooner for small shoots). Video projects take a bit longer: a highlight reel or short promo might take 1–2 weeks to edit, whereas a more complex video could take a few weeks. We'll give you a timeline before we start. If you have a hard deadline (e.g., an event or campaign launch), let us know upfront and we will do our best to accommodate it or advise you on what's possible.
- **How much do your services cost?** – Pricing varies per project because each one is unique – it depends on factors like the scope of work, travel, the complexity of the shoot, and editing time required. After we discuss your needs, we'll provide a transparent quote. We can work within many budget levels and are upfront about any expenses. For some standard jobs (like a basic real estate photo package or a 2-minute edited video), we have ballpark packages, but we'll tailor a proposal specifically for you. There are no surprise fees – any potential additional costs (like permits, extra revisions, etc.) will be discussed beforehand.

- **What if the weather is bad on the day of an outdoor shoot?** – We always keep an eye on the forecast leading up to a shoot, especially for drone flights. If conditions are unsafe or not ideal – for example, heavy rain, strong winds, or zero visibility – we’ll work with you to reschedule to the earliest convenient date. There’s no penalty for weather-related rescheduling; we want the conditions to be right to get the best results (and to ensure safety). If timing is critical (say, an event date that can’t move), we’ll have contingency plans – sometimes we can adjust timing on the day, or modify what we shoot, or in mild cases find workarounds (for instance, light rain might pause drone work but we can do indoor shots first). Rest assured, we’ll communicate closely and make the call together.
- **Can you work with our marketing agency or team?** – Yes, and we often do. We’re happy to collaborate with your existing marketing team, creative agency, or other vendors. If you have an art director or project manager with a specific vision, we’ll coordinate to make sure our work aligns with your campaign. We can also take the lead on creative direction if needed. Our goal is to integrate smoothly into the project’s workflow – we’re team players and comfortable taking or giving creative guidance.
- **Do you provide raw files/footage if requested?** – By default, we deliver edited, polished results (finished photos in high-res JPEG, edited video files, etc.). However, we understand some clients may want the raw materials. We can provide raw photos (in RAW format) or unedited video footage if arranged in advance. Keep in mind, raw files are large and unprocessed (not ready for use) and the ownership/licensing of raws can be discussed – often we retain rights to raw footage unless otherwise agreed. There may be an additional fee for raw file delivery, mainly to cover the extra handling and storage. Let us know your needs, and we’ll accommodate if we can.
- **What sets JSDetail apart?** – In a nutshell: our hybrid skill set and our dedication to storytelling. Many providers excel in one area (say, drone shots or ground photography). We do both at a high level and merge them seamlessly. This means less hassle for you (one team instead of multiple) and a more cohesive final product. Additionally, we really care about the “why” of your project – we’re not just going through the motions. We take time to understand your goals so that the images or videos we create actually achieve what you want (be it attracting buyers, engaging viewers, preserving memories, etc.). We’re also continuously learning and adopting new tech – from the latest camera gear to cutting-edge editing techniques – to give our clients the best possible service. Finally, our clients often tell us we’re just **really easy and fun to work with**, which is something we’re proud of! We combine professionalism with a friendly approach, making the process enjoyable for everyone.

(Did we miss something? If you have a question that’s not answered here, just reach out and ask! We’re always happy to clarify details about our services, process, or anything else.)

Additional Microcopy and UI Text

Navigation Menu

- **Home** – The main landing page, featuring our showcase and core value proposition.
- **Services** – Dropdown or section for our service offerings:
- **Aerial Services** (Drone Imaging)
- **Studio Photography** (Macro & Product)
- **Cinematic Storytelling** (Video Production)
- **Portfolio** – A gallery of our work. *(If the site has a dedicated portfolio page separate from the homepage preview.)*

- **About** – Information about JSDetail, our story, team, and values.
- **Contact** – A page or section for getting in touch with us (contact form and details).

(If using a mobile menu or hamburger icon, the tooltip/label can simply read “Menu” or use the same labels as above when expanded.)

Buttons and Calls-to-Action

- **View Our Portfolio** – Primary call-to-action button on the homepage hero (takes user to portfolio or examples of work).
- **Explore Services** – Secondary button on the homepage hero (scrolls to or navigates to the Services section/page).
- **Get in Touch** – A call-to-action button used in various sections (such as the final CTA on homepage or on service pages) leading to the contact form. Alternatively phrased as **Contact Us**.
- **Learn More** – A general purpose button for linking to more detailed information. For example, beneath a brief service description, “Learn More” could navigate to that service’s dedicated page.
- **Send Message** – The label on the contact form submit button. (E.g., after a user fills in their info, the button to send it could say “Send Message” or “Send”).
- **Play Video** – If we have video content or a showreel, a button or overlay text to initiate playback (e.g., on a featured video).
- **View Case Study** – If portfolio items or projects have deeper case-study pages, a button with this text can invite users to read more details about a specific project.

(All button copy is written in Title Case for a clean look, and we aim for action-oriented language. The tone is confident but inviting.)

Form Field Labels / Placeholders

- **Name** – (Label for the name input; placeholder text could be “Your Name”).
- **Email** – (Label; placeholder might be “your@email.com”).
- **Phone (Optional)** – (Label; placeholder could be “123-456-7890”).
- **Message** – (Label for the main text area; placeholder could be “Tell us about your project or question...”).
- **Submit Button** – Labeled as **Send Message** as noted above. After clicking, a brief confirmation text might show up.

Miscellaneous UI Text and Tooltips

- **Scroll Down** – A small prompt (sometimes an arrow with text) on the hero section to indicate there’s more content below. Could just be an arrow icon, but if text is used, “Scroll” or “Scroll Down” works.
- **Back to Top** – If there’s a back-to-top button/icon, its aria-label or tooltip can say “Back to Top” so users know its function.
- **Social Media Icons**: Tooltips or ARIA labels for social icons (if present in header or footer) should read like “Follow us on Instagram”, “Our YouTube Channel”, “Connect on LinkedIn”, etc., for clarity when hovered or for screen readers.
- **Portfolio Item Hover**: If portfolio images have a hover state or overlay, include a short tooltip like “View Project Details” or simply the project title so users know they can click for more.

- **Loading Messages:** If any loading happens (for example, a video loading or form submitting), a simple “Loading...” or “Sending...” message can be displayed. On successful form submission, a nice confirmation like “Thank you! Your message has been sent.” can appear.
- **Error Messages:** In case form validation fails, messages like “Please enter a valid email address” or “This field is required” should be clear and polite. For a general contact form error (say, network issue), something like: “Oops, something went wrong. Please try again or email us directly.” helps the user know what to do next.

(By keeping microcopy concise and informative, we ensure even the small text in the UI contributes to a smooth, user-friendly experience. All copy aligns with our brand voice – confident, clear, and helpful.)
